Total Positive Cases for Mono County Residents (last 30 d...

TOTAL POSITIVE CASES: 1741 (30-DAY INCREASE: 12.5%) / CASE RATE/100,000: 50.1

RECENT METRICS

Population Adjusted Case Rate per 100,000
(PCR-confirmed only)

NUMBER OF CASES BY WEEK FOR THE PAST MONTH

- *11/7 - 11/13: 24*
- *11/14 - 11/20: 52*
- *11/21 - 11/27: 65*
- *11/28 - 12/14: 49*

CDC INDICATORS AND THRESHOLDS FOR COMMUNITY TRANSMISSION OF COVID-19 TO GUIDE MASKS FOR PUBLIC INDOOR SETTINGS BASED ON VACCINATION STATUS

Indicator	Low transmission	Moderate transmission	Substantial transmission	High transmission
Daily case rate	< 1.5	1.5–6.9	7–13.9	> 14
Test positivity	< 5.0%	5.0%–7.9%	8.0%–9.9%	≥ 10%
Unvaccinated	Mask Required	Mask Required	Mask Required	Mask Required
Fully vaccinated	Mask Optional	Mask Recommended	Mask Required	Mask Required

* Statewide / ** Vaccine Equity Metric goal of 4 million doses

HOSPITAL STATUS

- No current COVID-19 related hospitalizations.
- Status = Green.

MONO COUNTY VACCINATION RATE AND DATA

- 67.7% Fully Vaccinated
- 7.0% Partially Vaccinated
- Latino Population: 67.6% Fully Vaccinated
- White Population: 64.7% Fully Vaccinated
- Multi-Race Population: 68.6% Fully Vaccinated
- Native American Population: 57.1% Fully Vaccinated
- Asian American Population: 73.8 Fully Vaccinated

MONO COUNTY VACCINATION RATE AND DATA BY AGE

- 5-11
 - 22% Fully Vaccinated
 - 11.5% Partially Vaccinated
- 12-17
 - 61.2% Fully Vaccinated
 - 7.3% Partially Vaccinated
- 18-49
 - 78.3% Fully Vaccinated
 - 8.1% Partially Vaccinated
- 50-64
 - 69.3% Fully Vaccinated
 - 4.6% Partially Vaccinated
- 65+
 - 63.4% Fully Vaccinated
 - 5.7% Partially Vaccinated

BOOSTER DATA

- 2634+ COVID-19 Booster doses have been administered to Mono County Residents.

OMICRON B.1.1.259 LINEAGE

- Omicron (lineage B.1.1.529) is a new SARS-CoV-2 variant that was designated as a Variant of Concern by the WHO on November 26, 2021.
- Omicron was first identified in South Africa and Botswana with earliest specimen collection dates of November 9, 2021.
- First reported case of Omicron variant in United States identified in San Francisco on December 1, 2021. As of 12/13/21, 30 states have identified the variant. Most cases are mild.
- Pfizer data suggests mRNA vaccines are effective especially if a booster has been administered.

OMICRON B.1.1.259 LINEAGE CDPH INSTITUTED MEASURES

- The California Department of Public Health (CDPH) is taking several measures in response to the Omicron variant including:
 - Monitoring for detection of the Omicron variant and other VOCs through the California SARS-CoV-2 Whole Genome Sequencing Initiative called COVIDNet, an unprecedented public-private partnership to provide California with genomic sequencing data for epidemiological efforts to control the spread of COVID-19
 - Prepared to perform epidemiologic analyses as soon as Omicron cases are reported in California
 - Recommending travelers from Southern Africa, Botswana, Eswatini, Lesotho, Mozambique, Namibia, South Africa and Zimbabwe and Malawi to follow the CDC guidance to test within 3-5 days after arrival, quarantine for 7 days, and isolate and test if COVID-19 symptoms develop.
 - Bolstering COVID-19 vaccination and booster efforts to ensure that all Californians aged five years or older have access to safe, effective, and free vaccines that can prevent serious illness and death from COVID-19.
 - Reminding the public to mask up in indoor places regardless of vaccination status

NEW CDPH GUIDANCE

New as of 12/13/21

- Universal masking mandate for all indoor public gatherings from 12/15/21 – 1/15/22
- Indoor Mega Events now require a PCR test with-in 48 hours of the event or an antigen test with-in 24 hours of the event
- The state recommends anyone who enters California get a covid test 3 to 5 days after arrival
- This is due to a 47% increase in cases since thanksgiving.
